The textbook is an educational standard on the theory and practice of crime scene investigation and includes many informative casework examples and photographs. On reading this book, students, entry-level personnel, and experienced practitioners will have a better understanding of the strengths and limitations of forensic science in its application to crime scene investigations." —Professor Don Johnson, School of Criminal Justice and Criminalistics, California State University, Los Angeles The application of science and technology plays a critical role in the investigation and adjudication of crimes in our criminal justice system.
